SUMMER SCHOOL (2022)

Students who are freshmen, sophomores, or juniors in 2021-22 and fail a course with a 50%-62% (F+) final average have the opportunity to recover the credit through summer school. A student is able to take/recover two courses in summer school. Students are especially encouraged to recover courses in summer school if:

- 1) the course is a core course, especially a math or English
- 2) they have applied to attend Apollo and need that credit to qualify

If a student fails a core or required course and chooses not to recover it in summer school, that course will be added back onto their schedule for 2022-23. This may require the students to be “doubled-up” meaning they, for instance, will lose some elective courses in order to fit both English 9 AND English 10 or Algebra I AND Geometry on their schedule. Also, depending on the student’s academic/credits situation, not recovering credits in summer school could cause the student’s on-time graduation to be in jeopardy. Once final grades are received in the guidance department, we will attempt to contact the home and/or cell numbers we have on file for your student to let you know that your student qualifies (failed with a 50%-62%) and in what course(s). The call will come from (419) 338-6801...if we do not speak with someone directly but are able to leave a message, we will let you know the details of what course(s) your child can recover and how to apply.

Summer School Details:

- Held through Apollo Career Center in an online format
 - Summer school starts June 15 and runs through July 15
 - **Required orientation** will be held via Zoom on June 15...you will receive more information from Apollo once payment or summer school waiver is received by Apollo (see below)
 - The cost for each course taken is \$120.00
 - Apply at apollocareercenter.com (click on High School” then click on the sun) or go to <https://apollocareercenterhs.com/summer-school/>
 - **Deadline to apply is June 13**
 - We will send Apollo a list of students from EHS who qualify and for what subjects (limited to 2)
 - If your student applies for summer school and has NOT qualified based on the final percentage, Apollo will deny their application. EHS reserves the right to NOT accept a summer school grade if a student has NOT met district qualification requirements stated above and takes the course(s) anyhow.
 - If you are a student who has registered to attend Apollo next school year, a link will be emailed to you to complete a “Summer School Contract” (fee waiver), so make sure you use a working email to register. If you end up attending Apollo for the 2022-23 school year, your fee(s) for summer school course(s) would be waived. If you sign a contract and end up not getting in to Apollo or choose to stay at EHS, you would be responsible for paying for the course, and Apollo will not give us the final transcribed grade until they receive payment.
 - If you sign up for summer school and have no intentions of attending Apollo, you will be emailed an invoice to pay \$120 per course taken...must be paid before receiving login and zoom meeting information.
 - Regardless of your situation, Apollo MUST receive your fee waiver contract OR payment before they will provide you with your course and login information.
- **If you commit to summer school to recover your credit(s), please keep up on your work, as each year we have students who pay \$120, fail the summer school course because they don’t finish it, then have to re-take the course again the following year.**
